***V2CDS Advanced Voice & Video Cross Domain Solution***

**Michael Blake**

Engineering Director & Chief Architect

Owl Cyber Defense

Abstract:

Seamless coalition data sharing and communication are vital to create an effectively combined all-domain military organizational command and control infrastructure and combat force. As the world's most secure and RTB 2.0 compliant video cross domain solution, V2CDS has offered the most advanced voice and video communications solution to achieve this unified, connected vision.

In addition to these proven capabilities, the latest version of V2CDS (2.0) provides VoIP and Video calling capabilities for real-time collaboration and communication across agencies, branches, and coalition nations.
