Software Development Lifecycles: Continued Evolution to Support for Agile Methodologies

Robert L. Linton
Business Consultant – Cloud DevSecOps
Micro Focus Government Solutions

Abstract:
Discover how the software development lifecycle (SDLC) has continued to evolve to support the agile methodologies used in DoD environments today. This session will discuss the value of integrating identified security vulnerabilities into your DevSecOps process for awareness, remediation, and risk reduction.

After the presentation, visit us in **Booth 1511** for an integration on capability demo.
