Moveworks AI Enterprise CoPilot

Peter Barrett

Director, Federal

Moveworks, Inc.

Abstract:

In an era defined by rapid technological advancement, the public sector faces unique challenges in bridging the gap between the needs of warfighters, civilians, and contractors, and the technologies they employ on a daily basis. To address these challenges, Peter Barrett, the Director of Federal at Moveworks, is happy to present Moveworks AI Enterprise CoPilot.

Moveworks, which recently announced its FedRamp Ready status, is aiming to be the first SaaS accredited IL5 (Impact Level 5) compliant AI solution that empowers public sector organizations to enhance operational efficiency while upholding the highest security standards. This presentation will delve into the pivotal role of AI in the public sector, emphasizing the unique requirements for handling sensitive and classified information. The presentation will outline what DoD agencies can expect to achieve with the Moveworks solution & learn about other defense organizations that have already had success with the platform.

By harnessing the power of AI, public sector organizations can streamline their operations, improve user experience, and allocate resources more effectively. The IL5 secure solution offered by Moveworks promises to be a game-changer, enabling public sector entities to adapt to the demands of the digital age without compromising on security and compliance.

Peter Barrett's presentation at the 2024 WEST Conference will be an essential resource for those looking to leverage AI in the public sector while ensuring that critical information remains protected. Moveworks' cutting-edge IL5 secure AI solution represents a significant step towards a more efficient, secure, and responsive public sector, ultimately benefiting both the personnel serving the nation and the citizens they serve.
