BinLens: Automated Binary Vulnerability Analysis

Ulrich Lang

CEO

ObjectSecurity

Abstract:

 Our binary analysis SaaS, commercialized product is available for purchase based on capabilities gained as part of a Phase II SBIR. BinLens provides proven, performant binary code scans and vulnerability analysis, compliance framework mapping (ISA/IEC 62443, NIST 800-53, 800-82), integration to DevSecOps pipelines, and reporting. The platform was commercialized from 5 SBIRs (ONR RedBox, DARPA VeriCoR, DTRA NLC) R&D, more than 250 customer discovery interviews, and collaboration with commercial partners including Lockheed Martin, Applied Integrated Technologies, IACI, ICS-ISAC/Kennedy Space Center, Accenture, and OT/ICS Cybersecurity Professional Services Providers (objectsecurity.com/binlens).
