Sea Hunter and Maritime Autonomous Behaviors

Dr. Timothy Barton

Chief Technology Officer

Leidos C4ISR Operation

Abstract: Leidos has worked with the U.S. DARPA and the U.S. ONR on DARPA's ACTUV program to design and build Sea Hunter, the technology demonstration vehicle that ONR is further developing through the Medium Displacement Unmanned Surface Vessel (MDUSV) program. This presentation will provide a brief overview of the program and vessel, maritime autonomy architecture, behaviors, and missions, and recent efforts in autonomous survey and autonomous logistics. The views, opinions and/or findings expressed are those of the author(s) and should not be interpreted as representing the official views or policies of the Department of Defense or the U.S. Government.
