***Artificial Intelligence at the Edge: It's Not Tomorrow's Technology, It's Today's Advantage***

**Justin Neroda**

Principal

Booz Allen Hamilton

Abstract: The talk will discuss the technology and analytical techniques that are available now for deployment to the fleet, squadron, or battlefield. Our speaker will highlight advantages of human-machine teaming for war fighters and make the applications understandable and accessible. The talk will discuss the misconception that the DoD is worlds behind industry as the major advancements have only occurred in the last 5 years; the call to action will be to act now, embrace AI and its technology, or the misconception will become the truth.
